ABOUT THE TRIP:

This adventure provides a unique, fun, educational experience. Each child will receive a bag of mining rough which is the raw dirt and rock particles from the mine. Hidden inside the bag are nature's natural wonders.

Each child will bring their rough to our large mining sluice. Water flows from a large tower, twisting and turning its way through the wooden sluice to where each child will slowly empty its bag into a screen bottom box. Then swish the box in the running water. This swishing is called sluicing.

The dirt washes away through the screen bottom box revealing your treasure. Remember, what you find you keep. With the identification card you can hold classroom discussions. We strive to use the finest mining rough to ensure easy identification for miners.
